

At present we have a team of Security Guards who work in plain clothes dealing with dishonesty events primarily in supermarkets.

While the team are based in Auckland, we have the capability of traveling throughout New Zealand completing “stings” and projects such as store openings.

We endeavor to reduce store shrink and change customer behaviour. Our team of professionals’ work under strict rules of engagement and receive in depth training to ensure they comply with the criminal law and client policies.

We have an excellent working relationship with the NZ Police and Auror who operate a crime prevention database of offenders and vehicles. Recently we have extended our services to include a Uniform “Concierge” guard service and this is operating in conjunction with a covert guard and is producing some excellent results.
